

MACHINE LEARNING FOR DATA SCIENCE

QUIZ 2

Name: _____ Reg No: _____

CLO: 1 Understand basic machine learning concepts, theories and applications.

NOTE: YOU ALSO NEED TO HIGHLIGHT OR UNDERLINE THE RELEVANT PART OF THE PAPER, THAT YOU USED TO ANSWER THE QUESTION.

Q No. 1: What exact problem is the paper solving? Clearly define the problem, and explain the research gap the authors claim to address.

Q No. 2: Analyze the dataset used in the paper.

1. What is the data source?
2. Size and distribution?
3. Train/test split strategy?
4. Any risk of data leakage or sampling bias?

Q No. 3: Explain the proposed model architecture in detail.

1. What are the input features?
2. How does data flow through the model?
3. Write key mathematical equations (loss function, optimization, activation functions, etc.).
4. Explain the architecture diagram in your own words.

Q No. 4: What evaluation metrics are used and why? Explain the overall results in your own words.

Q No. 5: Identify both explicit and implicit limitations of the study.

ADVANCE MACHINE LEARNING

QUIZ 2

Name: _____ Reg No: _____

CLO: 1 Understand basic machine learning concepts, theories and applications.

NOTE: YOU ALSO NEED TO HIGHLIGHT OR UNDERLINE THE RELEVANT PART OF THE PAPER, THAT YOU USED TO ANSWER THE QUESTION.

Q No. 1: What exact problem is the paper solving? Clearly define the problem, and explain the research gap the authors claim to address.

Q No. 2: Analyze the dataset used in the paper.

5. What is the data source?
6. Size and distribution?
7. Train/test split strategy?
8. Any risk of data leakage or sampling bias?

Q No. 3: Explain the proposed model architecture in detail.

5. What are the input features?
6. How does data flow through the model?
7. Write key mathematical equations (loss function, optimization, activation functions, etc.).
8. Explain the architecture diagram in your own words.

Q No. 4: What evaluation metrics are used and why? Explain the overall results in your own words.

Q No. 5: Identify both explicit and implicit limitations of the study.
